C-48360A Filter and Moisture Separator

C-48362A Pressure Regulator

C-48361A Line Lubricator

NOTE: Filter and Lubricator have ⅓ qt. bowls, ½" pipe thrd. openings. Max. line pressure 150 p.s.i. (CP wrenches should not be operated on air pressures above 125 p.s.i.)

FILTER and MOISTURE SEPARATOR, REGULATOR and LINE LUBRICATOR

By installing the illustrated water separator, regulator and line lubricator the life of the air tool is greatly increased. The water separator traps the moisture before it enters the air tool. The pressure regulator can be adjusted so that the correct air pressure enters the tool while high pressures are maintained at the compressor. The line lubricator allows the proper amount of lubrication needed for top performance.

Item	Package No.	Quantity Pkg.
